CHAINTRUM LABS LIMITED – WHY HONG KONG?

>>> Hong Kong, a global financial hub, offers an excellent environment for Chaintrum Labs Limited's ambitious crypto project. Its open regulatory framework encourages innovation in blockchain and cryptocurrency, while its rich talent pool and advanced infrastructure support our high-tech needs.

The city's thriving investment ecosystem and favorable tax system further enhance its appeal. By establishing our operations in Hong Kong, we align with the city's dynamic energy, fostering a promising future for our project.

HONG KONG

HOW CAPITALIUM IS BORN?

>>> The development of this **Intelligent Remuneration System**, made fully autonomous and secure, owes its success to a collaboration between skilled developers across Asia and the invaluable **contribution of ChatGPT**.

By leveraging the capabilities of Artificial Intelligence, developers were able to tap into **multiple lines of advanced code from ChatGPT**, allowing them to precisely configure CapitalIUM.

During the project, **ChatGPT played a pivotal role** in not only identifying and formulating the best strategies, but also providing valuable insights on financial aspects.

It assisted in making informed decisions regarding **risk management, reward structures, and financial security factors**, ensuring the overall effectiveness and profitability of CapitalIUM.

CapitalIUM, a novel dividend system, has emerged as a result of combining the well-established Staking Reward sector, long embraced by the Crypto community, with the transformative power of Artificial Intelligence. This fusion has paved the way for a new generation of dividend system generation, presenting an innovative approach to generating dividends.

AI FORMULAS

>>> In the BETA version, CapitalIUM offers 3 Formulas, each one giving access to a **unlimited earnings machine in real-time**, the Formula and free tokens (in BETA version only).

SafeAI Formula

1.4%-2% Weekly

FROM \$100

ModerateAI Formula

1.8%-5.6% Weekly

FROM \$1000

StrongAI Formula

4.8%-7.5% Weekly

FROM \$5000

CapitalIUM owes a significant debt of gratitude to private Asian investors who actively drive the LIUM token protocol forward. These dedicated investors, recognizing the value of early contributors, have chosen to reward them through three distinct formulas, especially **designed and tested by ChatGPT**. As a result, a portion of the dividends distributed by CapitalIUM is specifically allocated to investors who hold one of these Formulas, as well as through **airdropping LIUM tokens**. These dividends are derived from an investment fund valued at **3.5 million USD**, which is owned by Chaintrum Labs Limited. The involvement and support of these private Asian investors are pivotal in enabling the successful distribution of dividends and driving the growth of the LIUM project.

While the BETA version is ON, you will get as well **2000 LIUM tokens for each \$100 of Formula bought acquired**. The tokens will be visible only in your backoffice and then airdropped automatically to you on the platform launch.

"BOOST YOUR INCOME" PROGRAM – PRIZES

>>> Once you've registered, you can share your referral link with your friends. As a **FREE MEMBER**, you'll receive a commission of **2.5%** for every purchase they make on Formula.

ChatGPT Empowered: Revolutionizing Withdrawal Settings for Enhanced Financial Control and Accessibility

>>> The withdrawal settings have been elaborated by ChatGPT, an intelligent algorithm designed to optimize the financial structure and withdrawal policies of the business.

ChatGPT utilizes advanced computational models and algorithms to analyze various factors, such as revenue projections, member earnings, and business sustainability, to determine the most effective withdrawal limit settings. By leveraging its computational capabilities and access to extensive data, ChatGPT can provide valuable insights and recommendations to enhance the financial stability and fairness of the network.

Through iterative simulations and analysis, ChatGPT helped in designing withdrawal limit cashout settings that strike a balance between allowing members to access their earnings while ensuring the long-term viability of the business. It considers factors like business growth projections, member retention, and overall revenue to determine appropriate withdrawal limits that align with the financial goals of both the members and the company.

By relying on ChatGPT's calculations and recommendations, CapitalIUM can leverage the power of artificial intelligence to optimize its withdrawal limit cashout settings. This ensures that members can access their earnings in a fair and timely manner, while also safeguarding the financial health and sustainability of the network as a whole.

LIUM PROTOCOL

The logo for LIUM, featuring the letters L, I, U, and M in a stylized, outlined font. Each letter has small blue dots at the top and bottom, and thin lines extending from them, giving it a digital or circuit-like appearance.

As a valued contributor to CapitalIUM, you not only enjoy exclusive access to the BETA PHASE Floor Price but also have the opportunity to participate in the token launch.

The future advantages of holding LIUM make it an exceptional token for our ongoing development projects. With the implementation of the LIUM Protocol and its dividend business model, market dumping is prevented, guaranteeing a positive trajectory for the token instead.

“EXPERIENCE THE POWER OF BUYING PRESSURE WITH INCREASING DIVIDEND REWARDS, SAFEGUARDED BY THE LIUM PROTOCOL”

How to earn free tokens in BETA ?

1. After signing up with CapitalIUM, you will earn free tokens that you will be able to claim after the BETA at the launch of the official LIUMSWAP platform.
2. For each \$100 amount of formula bought, get tokens in your dashboard!
LIMITED EDITION FOR BETA MEMBERS ONLY

Sit back and witness your LIUM dividend rewards grow over time, as they continue to increase in value!

LIUM TOKEN LAUNCH

LEVERAGING STRATEGIC MARKETING FOR “UNPRECEDENTED BUYING PRESSURE”

>>> Our marketing team has implemented a groundbreaking strategy designed to maximize buying pressure during the launch of LIUM token. This approach has proven to have a tremendous impact on creating a sense of urgency and driving widespread interest among potential contributors.

By strategically leveraging various marketing techniques and partnering with key players in the ASIAN crypto community, we aim to accelerate interest in the Anti-dump protocol, leading an exceptional launch.

Benefit from the Floor Price

We are confident in maximizing the impact and dividend rewards of LIUM. **Investors can expect an extraordinary launch that propels LIUM to new heights**, providing long-term benefits for those who join us on this remarkable journey. Therefore these rewards will complement the dividends generated from our AI-powered formulas.

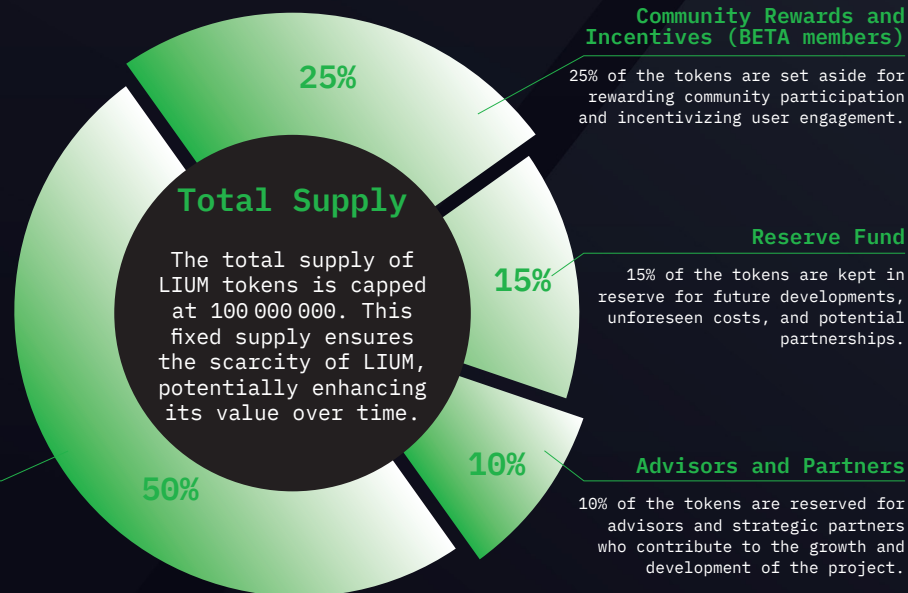

Maximize the potential of your LIUM holdings through AI-Formulas dividends and team commissions.

LIUM TOKENOMICS on ERC20 ethereum

>>> The LIUM token, conforming to the ERC20 standard, forms the backbone of our crypto ecosystem. The design of our tokenomics model promotes a **balanced, sustainable economy, fostering growth and incentivizing user participation.**

Distribution

The LIUM tokens are allocated as follows:

Public Sale

50% of the tokens are available for public purchase. This allows a broad, decentralized base of token holders from the outset.

Community Rewards and Incentives (BETA members)

25% of the tokens are set aside for rewarding community participation and incentivizing user engagement.

Reserve Fund

15% of the tokens are kept in reserve for future developments, unforeseen costs, and potential partnerships.

Advisors and Partners

10% of the tokens are reserved for advisors and strategic partners who contribute to the growth and development of the project.

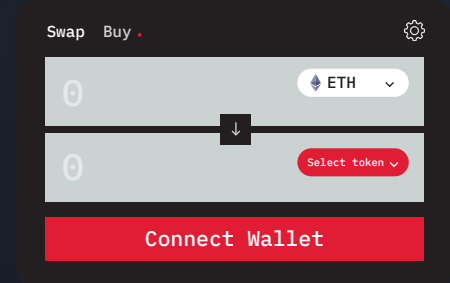

Utility

The LIUM token serves multiple purposes within our ecosystem:

- 1. Transaction Fees:** LIUM is used to pay for transaction fees on our platform.
- 2. Governance:** Token holders can participate in the governance of our platform, making decisions on key issues and future developments.
- 3. Rewards and Incentives:** Users can earn LIUM tokens by participating in various activities within our ecosystem.
- 4. Access to Exclusive Features:** Holding LIUM tokens may grant users access to exclusive features or services.

THE FUTURE LIUM PLATFORM – LIUMSWAP

>>> As we venture into the future, we are thrilled to introduce our revolutionary platform, LIUMSWAP. Poised to launch following our public sale, LIUMSWAP is more than just a crypto platform - it's a complete ecosystem where users can stake, vote, and swap tokens, integrating seamlessly with our existing LIUM protocol.

Staking

LIUMSWAP will introduce a staking feature, allowing LIUM token holders to stake their tokens and earn rewards. By staking LIUM tokens, users will have the opportunity to earn passive income, further solidifying their investment in our ecosystem. The staking process will be straightforward and user-friendly, making it accessible to both new and seasoned crypto enthusiasts.

Voting (Governance)

At LIUMSWAP, we believe in the power of decentralization. Therefore, our platform will incorporate a voting mechanism, enabling LIUM token holders to participate in important decisionmaking processes. This governance model empowers our users, giving them a voice in shaping the future of LIUMSWAP. From key operational decisions to new feature implementations, our community will have a say.

Token Swapping

The core feature of LIUMSWAP is, as the name suggests, the ability to swap tokens. Our platform will support swaps between LIUM and other ERC20 tokens. This feature ensures that LIUMSWAP is not just a standalone platform, but an integrated part of the wider Ethereum ecosystem. We aim to provide a seamless, secure, and efficient swapping experience, connecting our users to the expansive world of ERC20 tokens.

LIUMSWAP marks a new chapter in our journey, strengthening our commitment to creating a usercentric, interactive, and dynamic crypto platform. We are excited for you to be part of this evolution, shaping the future of cryptocurrency transactions together.

CHAINTRUM LABS LIMITED – OUR LEGACY AS INDUSTRY PIONEERS IN BRC-20

>>> Chaintrum Labs Limited holds a proud position as one of the early pioneers in the Bitcoin BRC-20 and Ordinals industry.

Our foray into the world of digital currencies predates the widespread adoption of Bitcoin, giving us a deep-rooted understanding of the industry's evolution and its transformative potential.

This early involvement has equipped us with the expertise and vision to navigate the dynamic crypto landscape, enabling us to create innovative solutions like our LIUM protocol and the upcoming LIUMSWAP platform.

As we continue to grow and evolve, we remain committed to our pioneering spirit, driving the frontiers of the crypto industry.
